

DO YOU HAVE SUN DAMAGED SKIN?

Research Volunteers Needed!

Basal cell carcinoma is a slow growing form of skin cancer and it appears most often on the sun exposed areas of the body. It is the most common form of cancer.

Dr. McDaniel at the Institute of Anti-Aging Research in Virginia Beach, VA is looking for potential volunteers for research studies for the treatment of basal cell carcinoma. The study doctor can tell you if you have basal cell carcinoma and determine if you qualify for these studies. All study- related medical care would be provided at no cost to you. **For more information call 757-417-8300.**
